EDUCATION

Vignan's Institute of Information Technology, Duvvada

B.Tech in Computer Science and Engineering

• CGPA: **8.85**

Andhra Pradesh

Sep 2023 – Jul 2027

EXPERIENCE

VIIT Mock EAPCET

Nov 2025 – Mar 2026

Software Engineer | React, Node.js, Express.js, Prisma, PostgreSQL

Live

- Developed the frontend for a mock exam portal with role-based access for students, teachers, and admins.
- Implemented full-screen exam enforcement with automated termination after exceeding **three malpractice warnings**.
- Built admin-driven paper generation using independent difficulty selection and percentage-based topic distribution.
- Enabled live exam monitoring, average score analytics, and leaderboard-based identification of top performers.
- Automated result emails with subject-wise analysis and Amazon gift card rewards for top 5 students.

PROJECTS

CF-Analyzer | *Java, Spring Boot, React, PostgreSQL, Docker*

Live | Backend | Frontend

- Built a full-stack analytics platform using Spring Boot REST APIs and React for monitoring Codeforces performance.
- Implemented secure authentication/authorization using **JWT** and enforced role-based access with **Spring Security**.
- Displayed real-time Codeforces data mapped to mentors, enabling centralized tracking of student progress.
- Integrated SMTP-based password reset and account verification workflows.
- Containerized the application using Docker and deployed backend on Render and frontend on GitHub Pages.

Taskyfer-Ai | *Java, Spring AI, Spring Boot, React, PostgreSQL, Docker*

Live

- Implemented **JWT** authentication and authorization using Spring Security to secure users and protected endpoints.
- Integrated GitHub AI models to auto-generate task descriptions, priorities, and time estimates from inputs.
- Developed scalable RESTful APIs for task CRUD operations using Spring Boot, Hibernate, and PostgreSQL.
- Built protected routing and centralized state management with React Context API, improving application maintainability.

Smart Updater | *Kotlin, Apache POI*

Live | Repo

- Developed a Kotlin-based Android application to automate monthly court case reporting for police personnel.
- Integrated Excel file operations (read/write) using Apache POI and implemented auto-completion, case management (Add/Modify/Remove), and one-tap sharing via WhatsApp.
- Added a preview option to view the live changes.
- Automated generation of disposed-case reports for that month, reducing manual data entry errors.
- Deployed and actively used by police personnel in real-world court workflows.

ACHIEVEMENTS

- **ICPC Asia West Regionalist** — All India Rank **484**; secured **69th** rank at the Chennai Regional Contest.
- Achieved Global Rank of 349 among 10,000+ participants in Codeforces Round 1089.
- Achieved Global Rank of 565 among 21,000+ participants in Codeforces Round 1050.

COMPETITIVE PROGRAMMING PROFILES

- **Codeforces**: [am_I_Newbie](#) (**Expert**, max rating: **1715**, **Top 9.5%**)
- **LeetCode**: [Bak_asta](#) (**Knight**, max rating: **1999**, **Top 2.5%**)

TECHNOLOGIES

- **Languages**: Java, Kotlin, C, C++, Python, SQL, JavaScript, HTML/CSS
- **Frameworks**: React, Spring Boot
- **APIs & Auth**: REST APIs, JWT
- **Tools**: Git, Docker, IntelliJ IDEA, Android Studio, VS Code, Eclipse
- **Cloud Services**: Render, Railway
